

Oerlikon Saurer

Oerlikon Saurer trade fair highlights at the ITMA Asia 2010

Arbon, May 2010 – Oerlikon Saurer is looking forward to welcoming visitors at the ITMA Asia in Shanghai from 22 to 26 June 2010. A visit to the Oerlikon Saurer booth C51 in Hall W2 will certainly be worth while. World innovations, technological further developments and futuristic services await the specialist visitors, presented by the Saurer Product Line in the embroidery segment and the Allma and Volkmann Product Lines in the twisting segment. A warm welcome to you all!

The ITMA Asia with the integrated CITME 2010 will attract high-calibre trade visitors to Shanghai. Due to the improving economic prospects for the current year, about 100,000 visitors from Asia and overseas are expected to attend the show. The staff at the Oerlikon Saurer booth looks forward to welcoming customers and prospective customers to their booth C51 in hall W2 and to showing them the latest innovations from the embroidery and twisting segments.

Embroidery – Saurer Epoca 05 Second Generation

Oerlikon Saurer presents the Saurer Epoca 05 Second Generation, the most modern shuttle embroidery machine currently available on the market. Apart from its technically mature solutions, the Saurer Epoca 05 Second Generation is a winner on account of its extraordinary flexibility. The latest Epoca version is the most complete embroidery machine on the market as far as the stitching of yarns and embroidering of fabrics are concerned. Customers will always find a solution tailored to their production requirements in the modular product family of the Saurer Epoca 05 Second Generation. The Saurer Laser option and the Sequins and Soutache device open up unforeseen new design possibilities, while the Saurer EmStudio design software permits creative ideas to be realised efficiently in practice.

Page 2 **Embroidery – Novelties: Innovative cutting element and superimposed sequins**

Oerlikon Saurer will present two novelties at the ITMA Asia. For easy, quick and flexible cutting of synthetic fabrics, Oerlikon Saurer will show for the first time an innovative cutting device. This can be used on PentaCut, manual Pentamat and standard machines. The second innovation refers to a new superimposed sequins device which allows embroidering of 3 and 5 mm sequins as single or superimposed sequins.

Twisting – Allma TCS for maximum customer benefit

The Allma TCS is the ideal production machine for the wide variety of requirements in the technical yarn segment. With its many advantages, this machine ensures optimum quality and maximum productivity. Thanks to precision winding, twist packages with a high density and excellent further processing properties become a routine occurrence. With a wide range of yarn counts of 235 to 45,000 dtex and delivery speeds of up to 350 m/min., the Allma TCS sets standards in economic efficiency, quality, safety and user-friendliness. The gauge increase to 830 mm means that also coarse industrial yarns can be ideally twisted, thus considerably widening the machine's spectrum to the benefit of the yarn manufacturers.

Twisting – The Volkmann FT is always one step ahead

The Volkmann FT (FusionTwister) is the new two-for-one twisting machine for staple fibre yarns with futuristic answers to today's trends such as finer yarn counts. Two important advantages of the Volkmann FT are certainly the market's best price-performance ratio and the lowest energy consumption thanks to its new e-save spindles. Furthermore, a number of economically attractive options widen the field of applications and the production flexibility and allow for very easy handling in the production process and maintenance.

Customer Support services are becoming more and more important

Our service staff is looking forward to showing visitors a wide spectrum of new solutions and services. These visitors will certainly not want to miss the attractive offers for retrofits, upgrades and information via the customer portal myOerlikon.com with its countless possibilities. Fast, well organised and competent – ready for the future – these are not just slogans, they are part of our service.

Page 3 **About Oerlikon Saurer**

Oerlikon Saurer with its product lines Saurer, Allma and Volkmann is a Business Unit in the textile segment of the globally successful technology group OC Oerlikon. The product line Saurer located in Arbon (Switzerland) is the world's leading partner for high-quality shuttle embroidery machines, innovative embroidery software and a wide range of accessories. The product lines Allma (Kempten, Germany) and Volkmann (Krefeld, Germany) are the leading international suppliers of two-for-one twisting machines, cabling machines and ring twisting machines for tire cord, industrial yarns, all staple fibre yarns, carpet yarns and glass filament yarns.
